

GREAT ALONE, BETTER TOGETHER

To enhance performance and protection, we always design our helmets and sunglasses so they have a seamless fit. The way in which sunglasses and helmets will be used together affects their design so that the specific needs of different kinds of rider can be met.

DISCOVER A SEAMLESS FIT

OTOCON & ORA CLARITY

A natural choice for enduro.

CORON AIR & ORA

Optimised for downhill.

KORTAL FAMILY & DEVOUR

For everything from all-mountain and enduro to trail.

TECTAL FAMILY & GRAVE

Functionality for trail and enduro.

AXION & DEFINE

A natural choice for any trail ride.

VENTRAL LITE & ELICIT

The ultimate pairing when weight is of the essence.

VENTRAL FAMILY & AIM

An easy choice for the road cyclist.

OMNE FAMILY & ASPIRE

Complementary protection for gravel, adventure, the road or the trail.

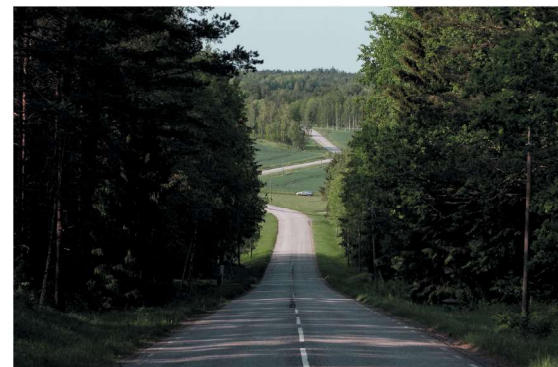

CLARITY SUNGLASSES

Clarity lenses redefine what it means to see while riding. Developed by POC together with Carl Zeiss, Clarity lenses filter specific peaks in the color spectrum to enhance precision vision.

The lenses intensify color and contrast and are tuned specifically to different riding environments, specifically urban, trail and road.

CLARITY ROAD

Clarity Road lenses have specific tints that are optimized for the road environment. The lenses increase contrast on the road surface for sharper definition and allow the rider to react earlier to surface irregularities.

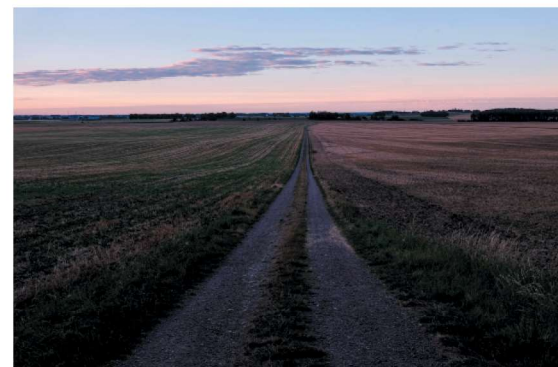

CLARITY TRAIL

Clarity Trail lenses have tints which are specifically designed to enhance contrast and boost trail associated colors, such as green and brown. MTB riding is often subject to abrupt changes in light and shadow and as such the lenses are optimized for variable light conditions.

CLARITY DEFINE

Clarity Define lenses are optimized for all-round use, giving sharper contrast and definition across a broad range of colours and light conditions.
